This NSF Research Experience for Undergraduates Site at South Dakota School of Mines and Technology (SDSMT), the University of South Dakota (USD) and South Dakota State University, provides undergraduate students a chance to conduct cutting-edge research focused on security printing and anti-counterfeiting technology. Counterfeiting is a growing issue in the U.S., posing serious economic, safety and national security concerns. The REU program is a multi-disciplinary program with research opportunities in Materials Science and Engineering, Materials Chemistry, Electrical/Computer Engineering, Chemistry, Physics, Mathematics, and Computer Science.

Program Description
• 10 week summer research program (May 30 – Aug 4\textsuperscript{th})
• Hands-on faculty mentored research
• Technical and Professional Development Seminars
• Social activities (including hiking, canoeing, barbeques)
• Enjoy the beautiful Black Hills of South Dakota

Award Information
• $5,000 stipend
• Room and board provided

Eligibility
• Undergraduate students majoring in science, math, or engineering
• U.S. Citizen or permanent resident
• Minorities and women are strongly encouraged to apply
