March 9, 2011
UCLA Students,

These two postings represent 100 positions, but they are only open until next Monday.

Have you thought about how exciting it would be to work on the new 787 Dreamliner program? Do you want an employer who is innovative? Are you seeking a career and a place that will motivate you – rather than just a job? Then check out our opportunities for engineering majors at Boeing.com/collegecareers. The specific 787 Manufacturing Engineer & Manufacturing Planning job requisitions are #11-1004751 & 11-1004755 (there are 50 spots for each req, but they are only open until March 14).

The Boeing Company provides hundreds of entry level positions each year all over the country, with large operations in Seattle, Southern California and St Louis. Boeing is one of the top 30 U.S. companies ranked as among the "Best Places to Launch a Career" for college graduates.

There are many reasons to work at Boeing. Beyond the day-to-day excitement of working on and with Boeing technology, our culture and values help make us one of the best places you can begin your career.

To be considered, you must apply at www.boeing.com/collegecareers
