Mattel’s Undergraduate Internship Program 2018

This summer, we have openings to intern with the Mattel Product Development and Electronics Teams on projects for 10-12 weeks during the summer. Working under the direction and guidance of experienced product developers - these engineering interns will gain valuable work experience in the preliminary ideation and development of new toy products. These students will work on meaningful projects that have a direct benefit to both Mattel and the intern.

INTERNSHIP DESCRIPTION

' Duration is for 10-12 weeks during the summer
' Hours are full-time (39 hours a week)
' Located at Mattel's headquarters in El Segundo, CA
' Paid internship - $18-$19/hr

This job will include some of the following:
' Assist in the development of future toy products
' Work with a cross-functional team, including an international team of engineers and designers
' Documentation of existing and new processes

BASIC REQUIREMENTS

• Be currently enrolled in an accredited university as a rising senior graduating in winter 2018-summer 2019
