NASA Aeronautics Scholarship Program

On behalf of the American Society for Engineering Education, I would like to bring your attention to an outstanding opportunity that is available for students studying in your department and/or your institution. ASEE administers the NASA Aeronautics Scholarship Program, and we hope that you can spread the word to your students about this excellent opportunity for educational funding.

NASA's Aeronautics Research Mission Directorate (ARMD) is directed toward enhancing the state of aeronautics for the nation, transforming the nation's air transportation system, and developing the knowledge, tools, and technologies to support future air and space vehicles. The ARMD focus is on cutting-edge, fundamental research in traditional aeronautical disciplines, as well as emerging fields with promising application to aeronautics.

Please see the official announcement below, which we would appreciate you sharing this with your colleagues and students. If you or any students have any specific questions, please feel free to email us at nasa.asp@asee.org.

The NASA Aeronautics Scholarship Program which is administered by the American Society for Engineering Education (ASEE) is officially accepting applications for the 2012 Aeronautics Scholarship Program. It is expected that approximately 20 undergraduates and 5 graduate scholarships will be awarded annually to students pursuing aeronautical engineering and related fields such as Mechanical Engineering, Chemical Engineering, Physics and Mathematics. Total allocated award amounts are up to $40,000 for undergraduates and up to $125,000 for graduates. These funds will go towards tuition and related costs, as well as to provide paid summer internship opportunities at a NASA research center.

Competitive applicants interested in this amazing opportunity should begin completing application materials immediately. A completed application will consist of profile information, academic background (including transcripts), a resume, an essay for undergraduates, a proposal for graduates, letters of recommendations, and any test scores, such as GRE's, when appropriate.

The application deadline is January 17, 2012. We encourage students to still apply.

To learn more about eligibility requirements, award benefits, application instructions, and to apply online, visit https://nasa.asee.org, or contact nasa.asp@asee.org with any questions regarding this program.

For additional information on NASA's aeronautics research and other opportunities please log on to http://aeronautics.nasa.gov.

Sincerely,
The NASA Scholarship Team
