Part-time Job for UCLA undergraduate Computer Science majors

We are a vibrant, progressive Space Environment Modeling Group (http://rbm.epss.ucla.edu/) in the UCLA Department of Earth, Planetary, and Space Sciences. We are looking for an enthusiastic undergraduate student to join our team. It's a good chance for you to be involved in cutting-edge research, to sharpen your CS skills, and to work with like-minded individuals. You will be paid for your work, and compensation will depend on your experience.

Your task may include: writing and testing computer codes, plotting and visualizing data, maintaining and writing documentation for data and models, website development and maintenance, some server maintenance, and contributing to a team environment. You will be able to create your own work schedule to fit your study load. Generally the following items are desirable, however learning on the job is also encouraged:

Experience in object oriented programming and basic ftp/ssh commands
Working knowledge of C++, Matlab
Working knowledge of Windows/MAC or Linux operating systems
Working knowledge of Microsoft Word, VIM, or other text editors
Must be able to commit 10 - 20 hours a week
Organization skills and a willingness to learn
Ability to work in a group environment
Positive attitude and punctuality.

Please send an e-mail to semg@epss.ucla.edu with your resume, explaining your knowledge and experience.
