Lab Assistant 1 Position—

Part time (12-15 hours/week) Lab Assistant 1 position is now open working in the School of Engineering's Nanoelectronics Research Facility. You will work with a dynamic team of engineers supporting one of the School's premier research laboratories. Work will be split about 50% between working in class 1000 cleanroom and in the office.

**DUTIES:**
- Assisting with inventory control and ordering
- Gathering and summarizing monthly accounting data and entering data into a database program.
- Assisting in maintaining training records, sending out email and scheduling training sessions.
- Generation and collection of equipment log sheets.
- Assisting in chemical bath changing in the fumehood and making chemical waste label.
- Maintaining and cleaning the laboratories.
- Recording equipment parameters eg water level, gas pressures etc.
- Assisting in customer billing and mailings.
- Assisting in new customer setups: recording data, making badges, filing paperwork.

**REQUIREMENTS:**
- Computer proficiency in data entry, using email and web browser.
- Ability to follow strict cleanliness rules (wearing smock and boots) to work in cleanroom.
- Highly organized and neat to handle large volumes of paperwork.
- Good communication skills to interface with staff and student customers. Also must be able to clearly use the phone for ordering parts and obtaining information.
- Highly motivated to help improve management systems.
- Good math skills for data and accounting summary.
- Fast learner for checking highly specialized equipment.
- Neat professional appearance for working with customers.
- On-time.
