Student Researcher for Web/app development

Professor Akihiro Nishi (ph.ucla.edu/faculty/nishi) in the Department of Epidemiology is looking to hire multiple graduate/undergraduate student researchers (GSR or other categories) to help him to implement his various social network experiments regarding happiness, physical activity, and motorcycle helmet use. The necessary skills include Swift/Objective-C, Java, and MySQL. In some of the experiments, a Groovy-based open network experiment platform (breadboard.yale.edu) is used. Excellent computer engineering skills – especially, one or more years of experience in web development are preferred. He expects this work to take initially 100 – 200 hours during the 2018 Winter and Spring quarters (5 – 49% GSR position or equivalent).

If you are interested, please send a CV and an one-page cover letter to akihironishi@ucla.edu If you have past products (e.g. iPhone app, game, website), please mention about them in the cover letter. This position is available immediately and open until filled.
