

**ENGR 95 or ENGR 195 Opportunity for Students to Work In and Contribute To a Startup Environment**  
(For UCLA Comp Sci/Eng Student Looking for Internship Experience)

**Professional Tutoring Service Startup Seeks a Student or Two with Website/Mobile App Developer Skills**

- *Are you student who wants a 2-credit industry internship for course credit this quarter with a dynamic new startup company, with an educational mission and flexible work schedule?*
- *Are you eager to apply your knowledge of web business applications and project workflow to help develop a new, integrated, innovative digital platform?*
- *Do you have desire to devote your programming expertise in a startup company industry internship, which could lead to mentorship & industry experience*
- We are a Professional Tutoring Service Startup with an opportunity for a student or two, to fulfill an ENGR 95 or ENGR 195 2-credit internship to contribute their front-end, back-end or full stack programming skills to our company's new web development/mobile app development platform. The student(s) would contribute to the front-end and back-end programming, interface, website, database creation, and the mobile app design of our service. You will work closely with the company founders, and your work will potentially impact a vast community.
- We're Westwood and Beverly Hills-based, and will consider UCLA students in any year of ENGR/Computer Science study with the following:

**ENGR 95 & 195 Internship Web/Mobile App Dev Position Requirements:**
