

COM DEV is a global designer and manufacturer of space hardware. We are world leaders in the production of space-qualified passive microwave equipment, specialized electronics and optical subsystems. We have over 1,200 employees at facilities in Canada, the United Kingdom and the United States.

COM DEV manufactures advanced technologies and subsystems which are sold to major spacecraft builders for use in communications, space science, and remote sensing. Our technology is used on more than 900 spacecraft to date, including 80 percent of all commercial communications satellites ever launched.

COM DEV USA was established to respond to the need for a secure, stable and sophisticated domestic supplier to US National Security programs. Thirty years of space industry know-how in the form of design software, processes, automation, management systems and business practices have been established in our location in El Segundo, California. COM DEV USA's product lines include qualified microwave components and integrated subsystems consisting of filters, electro-mechanical switches, ferrite devices and antenna feed components.

Engineering Intern

In this position you will be exposed to many facets of engineering involved in the design, test and manufacture of space qualified passive microwave equipment. The primary scope of the internship will be to support senior engineers in the development of a web-based knowledge space on the company Intranet and to lead the team's efforts to assemble and consolidate unstructured engineering data from various sources within the platform created.

Requirements

- Enrolled full-time in an accredited college or university. Sophomore level or higher is preferred.
- Minimum of a 3.0 GPA and majoring in engineering or the sciences.
- Excellent computer skills and familiar with website layout and content creation.
- Experience with Atlassian Confluence, HTML, JAVA, and other web page design languages are desired.
- Demonstrated time management skills and ability to determine project parameters once provided general requirements.
- Have strong interpersonal skills as well as demonstrated ability to effectively work in a team environment.

This is a paid summer internship which will run for approximately 10-12 weeks (May/June through August/September).

Due to the nature of the work of COM DEV USA, *U.S. Citizenship or Permanent Residency is required.*
