Join a diverse, committed, and exciting group of freshmen and sophomores from around the country on an 8-week journey from the urban jungle to the old growth forest and back.

- Explore conservation of biodiversity across urban, managed, and protected environments
- Connect biodiversity conservation to cultural heritage and environmental justice
- Understand biodiversity conservation and environmental justice in the context of food systems, water systems, climate systems and ecosystems
- Network with conservation professionals from agencies, NGOs, and academic institutions

This is a 2-year immersion program. The Year 1 experience, Classroom in the Field, starts on June 19, 2016. Doris Duke Conservation Scholars will have all travel, food and lodging paid during their 8-week summer experience, and will receive a weekly stipend of \$500. Year 2 Scholars will join a Conservation Practice Team, where they will be paired up with conservation professionals and academics for a 8 week team internship.

Explore why conservation can make a difference and how you can make a difference in conservation.
