The Research Experiences For Undergraduates (REU) program offers research opportunities at 10 multi-hazard engineering equipment sites during a 10-week summer research program.

Study areas include earthquake, wind, tsunami, coastal engineering, data management and cyberinfrastructure.

Benefits of Participation
- **WORK** with experienced faculty and graduate students
- **WRITE** a professional, publishable research paper
- **NETWORK** with peers in research group meetings
- **LEARN** about graduate school and career development
- **BUILD** relationships through mentoring
- **GAIN** hands-on research experience

**REU Block 1: May 27-August 4, 2020**
- Florida International University
- Lehigh University
- University of California, Berkeley
- University of Florida
- University of Texas, Austin
  - Mobile shakers program
  - Cyberinfrastructure

**REU Block 2: June 15 – August 21, 2020**
- Oregon State University
- University of California, Davis
- University of California, San Diego
- University of Washington

Undergraduates participate in hands-on, research-based projects in earthquake, wind, tsunami, or coastal engineering. Sites also include data management and cyberinfrastructure components.

“*I got to see the flexibility, freedom, and unexpectedness that comes with conducting research and how everything helps shape you into a confident individual.*”
