

RESEARCH EXPERIENCES FOR UNDERGRADUATES

VIRTUAL RECRUITMENT WEBINAR

Oct. 8, 4:00-5:00 CST

Are you interested in natural hazards research from an engineering or social science perspective?

Did you know most participants in the NHERI REU Program have not participated in research before their summer experience?

Learn more about National Science Foundation's NHERI REU program.

Attend the **REU Virtual Recruitment Event** on Wednesday, Oct. 8, 2020, from 4:00 p.m.-5:00 p.m. CST. [Register today online.](#)

- Hear from NHERI REU alumni about their summer research experiences and how research impacted their careers
- Learn about the program, funding, and application process
- Learn how you can apply

The NHERI Research Experiences for Undergraduates (REU) program offers funded research opportunities at 11 multi-hazard engineering equipment and social science sites during a 10-week summer research program.

Study earthquake, wind, tsunami, coastal engineering, data management, cyber-infrastructure, reconnaissance, or natural hazards social science research.

Travel funding provided, plus a stipend subsidy for room and board for the 10-week summer program.

Underrepresented minority, women, and military veteran undergraduate students are encouraged to apply.
