## Job Opening

### Software Engineer Internship

ACTA is the leading space and rocket launch safety company in the United States. We provide analysis, modeling and engineering support for the space, defense, antiterror, aeronautical, and petrochemical industries. We solve complex engineering problems using state-of-the art numerical and simulation models and develop specialized software to characterize complex phenomena. This position is in our main office in Torrance, CA. For more information about the company, please visit [www.actainc.com](http://www.actainc.com).

We are looking for a Summer Intern to join our development team in Torrance to develop and update our software from VisualBasic 6 (VB6) to VB.NET. The successful candidate will possess the ability to learn quickly and adapt to new challenges.

#### *Requirements*

- **Experience developing graphical user interfaces in VB.NET using Visual Studio**
- Good oral and written communication skills
- U.S. Citizen

#### *Desired knowledge*

Understand COM/.NET interop  
Physics or statistics background

#### *To apply*
