

The Advanced Network Technologies Division at NIST has several staff, summer intern, postdoc, visiting researcher positions in the areas of:

1. Internet Inter-Domain Routing Robustness.
2. Secure Domain Name System Technologies.
3. Network Anomaly Detection and Internet Traffic Analysis.
4. Network Function Virtualization / Software Defined Networking.
5. Measurement Science of Complex Networked Information Systems.
6. Advanced DDoS Mitigation Techniques.
7. Networked Cyber-Physical Systems and Internet of Things.
8. Next Generation Internet Architectures.

We are currently accepting applications for summer undergraduate / graduate internships.

Deadline November 3, 2015

For more detailed information on these topic areas, and the specific opportunities available, and application processes, see:
