

Aerospace Corporation Intern Position

At The Aerospace Corporation, we've got space for your imagination, exciting work on national-security missions, a longstanding relationship with the government, and a reputation unmatched in the industry. In order to remain the leader in space technology development and implementation, we need the brightest minds and most experienced professionals in the industry. Our people are our most valuable asset.

We are currently looking for Interns who are willing to work with a company that has been an integral part of U.S. space history. You'll grow in a stimulating environment, working with and learning from a diverse group of extremely talented men and women, and contributing to the development of national-security space programs. Intern positions are available at our headquarters in El Segundo, California and our office in Chantilly, Virginia. We are seeking college students at the sophomore level and above majoring in science, engineering, computer science, mechanical engineering, aerospace engineering, information systems, and mathematics. Job assignments are designed to give students the opportunity to work in scientific, technical, or administrative areas of the company.

We offer competitive compensation, attractive working conditions, and a professional environment. As an Aerospace Corporation employee, you'll enjoy an excellent benefits package. We seek diversity as a means of enhancing our business as we are an equal opportunity employer.
