

WANTED: Part-time CHEMISTRY **student for Printed Electronics**

Aneeve is a UCLA startup located on campus at the CNSI building. We are innovating new processing that enables the printing of next generation of printed low cost electronics. We work with organic and inorganic ink formulations, printing processes and methods to derive stable and reliable printed electronics. We are seeking a talented chemistry student (Undergrad, Master or PhD level) to work PART TIME, be part of our team, and complement our EE competency.

- Seeking Chemistry Major
- Responsible for printing process innovation
- Responsible for nanomaterial manipulation at the macro level
- Working in a multidisciplinary team
- Convenient on-campus location (mix work with studying)
- Flexible hours
- Expected work load: 20 hours per week
