

Description: We are looking for a self motivated individual with a heart for helping people and justice driven. Someone who has experience with writing code for apps. We are looking to launch them (3 apps) in IOS, Google and android marketplace. Someone who can work in their own space, while working in pre-negotiated timelines. This won't be an internship where you'll just be getting coffee, this will be one where you'll be creating and making a difference. We will be working with LA county as well on another project that will help give the county tools to end Sexual Assault, Domestic Violence and Child Abuse.

Pay: Will be a certain % of downloads. For example if the app goes for .99, you may get .05-.10, that being said, we have a large reach nationally.

What I need:

- 1) Please familiarize yourself with The Joyful Heart Foundation. You can read more about it here. <http://joyfulheartfoundation.org/about-us/our-story>
- 2) Please send me your resume in an attachment to the email below as well as any links to work you've already done.
- 3) Please send a cover letter telling me about yourself. Your goals and how taking a stand against rape, domestic violence and child abuse would affect you and our world.
- 4) If selected we would meet for an informal meeting. There I would need you to sign an NDA and then we can talk about the apps. Once this takes off, there will be opportunity to develop your own ideas for apps.

Full disclosure: I am not nor will you be employed by the Joyful Heart Foundation. You will be an independent contractor. However we work very closely with the JHF and this is an amazing opportunity to help change the world.

I look forward to hearing from you all and have a great day.

Cheers,
Kyle Wise
