

ARETÉ ASSOCIATES

Software Engineer

Do you enjoy:

- Developing software that solves *real* problems facing *real* people?
- Thinking about challenging problems which demand out-of-the-box solutions?
- Learning cutting-edge computational paradigms and exotic math?
- Working with world experts in an environment where you define your role?
- **Not** working on boring "enterprise" software that makes you yearn for the weekend to arrive?

If so, we are interested in talking with you!

Areté Associates is an employee-owned small business (ESOP) focused on advanced science and computational solutions to some of the most challenging technical problems faced by the United States (think the X-Files meets Silicon Valley). We foster a stimulating, collaborative work environment that encourages the creative contributions of *all* employees in achieving the goals of the company.

We currently seek talented, motivated entry-level to mid-level software engineers for our headquarters in Northridge, CA, to develop cutting-edge, novel software solutions in the areas of signal and image processing algorithms, modeling and simulation, remote sensing, and data analysis and interpretation.

Position Requirements:

- C/C++
- IDL/Matlab
- OpenGL/GPUGP
- Unix/Linux
- Visual Studio
- BS or MS in a Technical Discipline
- Object Oriented Programming
- Threading
- Good communication skills
- Security Clearance (desirable)

Benefits Package including but not limited to:

- 4 Weeks Paid Time Off
- Full Medical with Dental & Vision
- 10% Pension Distribution
- Professional Dues & Subscriptions
- Flex Hour Work Schedule
- Educational Reimbursement
- Health Club Reimbursement
- Casual Dress Code

Interested or know someone who might be? Submit your resume online at: <http://www.arete.com>. Applicants selected will be subject to a government security investigation and must meet eligibility requirements for access to classified information. U.S. citizenship and drug test are required to meet position eligibility.
