Big Data Engineer-New Grad

You take a methodical approach to solve problems with a commitment to deliver quality code. You enjoy interesting challenges and you have a hunger and driving desire to transform the business of data, and you are looking for the right place to make your contribution.

We are Metanautix. Our founders are former Engineers from Google and Facebook, who pioneered big data. Our disruptive product integrates data silos across organizations no matter the size, shape, format, or location. Metanautix Quest is all about speed, scale, and simplicity. We are well funded by Sequoia Capital and our customers include public companies in e-commerce, security, telecom, and data visualization.

You will be intrigued by new developments with this disruptive software, team environment and passion for excellence. Your efforts will build a next generation data analytics platform to help large enterprises do end-to-end analysis.
