

## Overview

Blacksand Group is now seeking highly motivated candidates for a part-time Software Development position to accelerate development of a web-based portfolio analytics tool. Blacksand Group is start-up asset management firm currently designing a stand-alone web-based application which provides retail and institutional investors with unique, simplified, graphics-based portfolio analytics. Candidates will have the opportunity to contribute to the creation, design, and development of the product and work with an experienced team with a proven investment and entrepreneurship track record.

## Description of Product

Blacksand Group is currently accelerating the development of a set of unified web-based portfolio analytics tools, called [StratoSquare.com](http://StratoSquare.com). The software suite enables efficient access to an aggregate set of asset allocation data points and facilitates the use of proprietary investment tools. The software suite is graphics-based and aims to simplify the investing, monitoring and allocation experience for retail and institutional investors alike.

## Qualifications

- Computer Science, Engineering, Statistics, Mathematics or other quantitative major
- Experience with C# ASP.NET (preferred) or other OO language
- Experience with MVC-based forwards, SVN and familiarity with JQuery
- Proven analytical and problem-solving skills
- Strong work ethic and willingness to learn
- Strong written, oral and interpersonal communication skills
- Demonstrated leadership and team-based experience
- Desire to work in agile, product-focused, start-up environment

Time commitment for this position will range from 10 - 20 hours per week, with work performed remotely via data sharing web tools. Blacksand Group is seeking candidates who are passionate about learning and garnering experience in a start-up environment.
