**Job Description**

**Business/System Analyst - Cloud Computing Company**

We are currently looking for a highly motivated and talented Business System Analyst with great ideas and a passion for making the world a better and more interesting place through technology innovation.

**Company**

Eccentex is a fast-paced high-tech organization located in Culver City, CA, with explosive growth potential in the field of cloud-based computing. Both, our partners and customers successfully leverage our cloud SaaS and PaaS solutions to solve some of their most challenging business problems. We are a software development company specializing in ASP.NET and C# Web Applications development.

**Responsibilities**

- Effectively communicate with clients to gather and document business requirements as well as determine how to help our clients simplify their daily business activities and cut operational costs
- Apply your strong problem solving skills in resolving technical issues and suggesting improvements to existing systems, applications and tools
- Work with the engineering team to successfully convert business requirements to technical requirements
- Build web-based cloud solutions on our dynamic business platform AppBase
- Closely work with customers during testing and post-production phases ensuring efficient implementation and user adoption
- Develop documentation that includes business requirements, system specifications and user guide materials

**Qualifications**

- Minimum 5 years experience in Business/System analyst role with technical background
- Bachelor or Master degree in Computer Science or a related field
- Must have excellent writing and communication skills
- Ability to work with minimal supervision and in a team environment
- Previous experience with training is highly preferred
- Ability to travel - up to 70% of the time, depending on the assignment

This is a full-time position. If you (1) have a deep passion to innovate, (2) are motivated by responsible and original business, (3) want to work beside those just as inspired, (4) are energized by making people's lives easier with benefits of new technologies, and (5) are energized to succeed. Let's connect!
