

## Job Description – CC Mobile Ventures

We are a rapidly growing software development firm that has secured multiple six-figure investments for our ventures. We are looking for an independent iOS developer who possesses a passion for pushing mobile technologies to their limits, to design and build the next generation of our mobile applications. We are seeking a developer familiar with real-time chat systems, geo-positioning, video chat functionality and various user interactions. Contract and delivery time is expected to be 1 month. Bonuses are contingent upon performance and delivery within the allotted time. Candidates may be considered for full time employment upon completion of this project, including an equity-stake in its performance.

**Serious inquiries only.** Please contact [ccmobileventures@gmail.com](mailto:ccmobileventures@gmail.com) for additional information.

### Responsibilities

- Design and build geo-based user chat app application for iOS devices.
- Familiarity with real time video chat and applicable libraries. Similar apps include Tinder, Bumble, Etc.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.

### Requirements

- Pursuing BS degree in Computer Science, Engineering or a related subject
- Proven working experience in software development
- Experience in iOS development
- Have published one or more iOS apps in the app store
- A deep familiarity with Swift, Objective-C and Cocoa Touch

- Experience working with iOS frameworks such as Core Data, Core Animation, Core Graphics and Core Text
- Experience with third-party libraries and APIs applicable to geo positioning, real time chat, video chat, user database and interactions
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
