

[Carbon Lighthouse](#) is still growing in both our SF and NYC offices! We're actively looking for a Senior Building Systems Engineer to be based out of our SF office. In addition to that role we still have several openings across Engineering, Sales, and Marketing.

Apply through the linked job descriptions below. In addition to drive, fitness for the mission, and smarts, this is a great opportunity for people who want to be involved in large scale challenges that require long term persistence.

- [Sr. Building Engineer | San Francisco](#) - Carbon Lighthouse is looking for an experienced and inquisitive engineer with deep technical experience working with the mechanical systems found in commercial buildings. This position is part of our Building Innovation Group, which resides within the Strategic Initiatives Team.
- [Strategic Partnerships Manager | San Francisco](#) - As our Strategic Partnerships Manager within the Marketing team, you'll be tasked with translating business goals into integrated sales and marketing initiatives that grow brand recognition and lead generation.
- [Marketing Project Manager | San Francisco](#): - Carbon Lighthouse is looking for an inspiring, driven Marketing Project Manager to help our rapidly growing Marketing function achieve high impact.
- [Project Manager\(s\) | San Francisco | Implementation Group](#) - We're looking for driven and smart Project Managers to join our Implementation Team, the group responsible for developing and implementing our clean energy service in buildings.
- [Field Engineer\(s\) | San Francisco | Implementation Group](#) - We're looking for people to innovate our technology and energy service, and help us grow our national presence. As a Field Engineer you will directly influence how we operate, focusing on improvements like: gathering accurate data more quickly, making field work more efficient and effective, expanding our network of contractors, improving feasibility checks, streamlining contractor management, and applying new strategies to maximize energy savings potential.
- [Field Engineer\(s\) | New York | Implementation Group](#) - We're looking for people to innovate our technology and energy service, and help us grow our national presence. As a Field Engineer you will directly influence how we operate, focusing on improvements like: gathering accurate data more quickly, making field work more efficient and effective, expanding our network of contractors, improving feasibility checks, streamlining contractor management, and applying new strategies to maximize energy savings potential.
- [Engineer\(s\) | San Francisco | Energy Modeling Group](#) - We're looking for driven and smart Engineers to join our Energy Modeling Team, the group responsible for developing our clean energy service in buildings.
- [Senior Software Developer](#) - We're looking for an adaptable, self-driven, full stack Senior Software Developer to work and grow with us to envision and build out our software platform and accelerate environmental impact. Along the way, you'll learn all about energy efficiency, solar, real estate markets, construction, and probably get your hands dirty (or at least dusty) on site visits.
- [Executive Account Manager | Honolulu | Sales](#) - This position is perfect for someone with 3+ years of experience in elective, complex, financially driven business-to-business sales. The right candidate will know how to strategically sell into the C-suites of organizations, be committed to our environmental mission, possess great curiosity, ask challenging questions, and think creatively and independently.
