

DESIGN A ROBOT

WIN A \$1,000

OVERVIEW:

Break Media is looking for a creator to bring a robot made of licorice to life. The robot will need to perform a few basic tasks. Our team will create an amazing time-lapse video of your process and the robot's ultimate functionality, which will then be launched on our website.

DETAILS:

Participants need to submit a proposal outlining the building plans, mechanical capabilities, and artistic design of the licorice robot, as well as include a proposed budget and timeline. The winner will be chosen based on a combination of ingenuity and cost effectiveness and will receive \$1,000 prize in addition to project financing.

MORE DETAILS:

The robot must be at least 2.5 feet tall and be able to be built in a single day. Otherwise, the design is completely up to you. The proposal deadline is Monday, February 4th. Please feel free to work solo or in a team.

Contact Taylor Thompson at tthompson@breakmedia.com to activate your application and receive further details regarding the contest.
