## JOB DESCRIPTION

### Your responsibilities:

As a member of the deep learning team, you will design, develop, configure and optimize deep neural networks for various tasks such as detection and classification.

Ability to work fast with teams in an open-table company culture is important.

### You must have:

- PhD, M.Sc. in Computer Science, Electrical Engineering or Econometrics
- High proficiency in C++, Python and/or Java
- Experience with data-driven statistical or machine learning methods.
- Enjoys a highly collaborative environment with minimal supervision.
- Experience with software engineering best practices including unit testing, continuous integration, and source control.

### Great to have:

- Proficiency in Torch, Theano, Caffe
- Top-tier publications (NIPS, PAMI, CVPR etc.) or proven successful industry experience

## Application Requirements

Please send the following to [careers@oben.me](mailto:careers@oben.me)

- Detailed resume and/or LinkedIn profile
- Links to any research / papers you have been an instrumental part of and are proud of
- Any code you are proud of and is public
- Name of instructor / adviser, if any along with link to their profile

- Cover Letter identifying your five favorite apps on your phone
