

## Attention Seniors and Graduates

*Are you competitive in nature and tend to fall into the leader role in your activities? Have you considered taking your Electrical Engineering education and pursuing a career in Innovative Product Development? Do you dream about being in an Executive Leadership role someday, but unsure how to win an opportunity to get the appropriate training?*

**Husqvarna** is a globally recognized market leader in the Outdoor Power Equipment and Commercial Lawn and Garden Industry. Their reputation for Quality, Innovation, and Environmental Consciousness have resulted in phenomenal business prosperity. The North America Corporate Headquarters (located in Charlotte, NC) is hand selecting new college graduates in their prestigious **Leadership Development Program**. These future Senior Managers will have the opportunity to receive hands-on training by the industry's top Research and Development Engineers. Our products are becoming more and more automated and we need Engineers to lead the development of the Electrical and Electronics aspects of our Outdoor Power Equipment.

If you are interested in applying to this 2-year Leadership Rotational program, you must be flexible and able to live and work in short-term locations (including Europe) and able to adapt easily to change. At the end of the 2-year program, the individual will be placed in an Electrical R&D Engineering role our state-of-the art R&D Center located in Charlotte, NC.

### Qualifications include

- Bachelor Degree in Electrical Engineering
- Demonstrated Computer Science skills and experience
- Ability to travel (including international assignments) and live short term in Europe and Charlotte, NC.
- Self motivated with natural leadership abilities

The chosen applicant will start summer 2016 for orientation and officially begin their first rotation in the fall. **Seniors should apply now in order to have their opportunity to interview.**

**Application deadline is Friday, January 29, 2016**

Please send your resume and intentions to
