

Electrical Engineer @ Preston Cinema [Santa Monica, CA]

Preston Cinema manufactures remote lens control systems for the cinema industry. We build high precision, real-time wireless controls along with our custom motor and camera control circuitry. Design, production and repairs are done in-house. We need help with production and repairs of their systems. Related circuit types are RF, power, analog and digital. We also have multiple microcontrollers on most products. This position is very hands on and any candidate will learn a great deal.

Requirements:

-BSEE

-Must be good with analog circuit trouble shooting.

-Must be good with customer support.

-Must be self sufficient and able to self prioritize.

Good to have: C or Assembly debugging skills

Pay: Commensurate with skill.

Send your resume to James Shull james@prestoncinema.com for consideration.
