

## Engineering Tutor Opportunity

Looking for tutor to teach 7-year old daughter basic engineering. Would like to encourage her love of building things and soldering and playing with LEDs and I want to ensure that she sees herself as a girl who can participate in this field (by osmosis, by example and by doing). Hoping to find a tutor (graduate student preferred) who is knowledgeable enough to teach her the basics, but also make it fun and help her to execute projects and to find simple solutions to problems. The compensation is 25 per hour, for 2 hours per weekly session. Located in Santa Monica, but would happily come to you at UCLA. We are also available during the day and on weekends. Contact Sharlene at [azam\\_sharlene@yahoo.com](mailto:azam_sharlene@yahoo.com) if you are interested.
