

## *Environment California*

**Description:** Environment California is a statewide, non-profit environmental advocacy group. Right now we are working on bringing more electric vehicles to California's roads and making it easier for homeowners to get solar power on their rooftops.

We teach our interns how to analyze environmental problems, advocate for smart solutions, and build public support. They work one-on-one with one of our advocates or organizers, providing a unique, mentored experience. We offer research, legislative, media, and field organizing internships.

These internships focus on 1) direct civic engagement and 2) training students on the skills they need to land a job in the environmental movement after graduation.

Environment California internships are unpaid, but we can help your students receive academic credit.
