

Job Title: Business Technology Analyst / Consultant Life Sciences

Locations: Los Angeles

Passionate about technology? Deloitte Consulting LLP is looking for candidates with exceptional leadership and problem-solving skills to join our Business Technology Analyst (BTA) and Consultant programs. Technology analysts/consultants partner with our clients' business and IT organizations to deliver business-led, technology-enabled solutions that help enterprises adapt to challenges and opportunities. From agile systems design to large-scale deployments, future Deloitte practitioners will advise clients, cut through complexity, and inspire value-driven decisions. Join us in leading from the front!

Work you'll do

As a Business Technology Analyst/Consultant, you will be an integral member of a service delivery team, collaborating with diverse and talented team members to help solve problems, improve performance, and generate value for our clients across a broad base of industries. You will have opportunities to create an impact and assume ownership of client deliverables, ranging from updating an organization's IT model to better align with their enterprise strategy, designing a single data and technology architecture to support their financial systems, or even conceptualizing and implementing a brand new health care system to adjust to changing market demands. You can capitalize on our cross industry presence to find your niche and build your individual brand within the organization.

Deloitte is specifically seeking candidates for its Life Sciences Technology Consulting practice. As part of this practice, you will serve Deloitte's life science and healthcare clients by providing strategic advice on how technology can support their business strategy and operational goals. Some example projects include:

- Advising key R&D leadership on the appropriate business process, operating model and technology goals for R&D organizations to best support their overall strategy
- Advising R&D organizations how to rationalize and harmonize their business processes and supporting technology
- Assessing how and which technology solutions will best support the latest in scientific and business analytics
- Supporting global implementation of business processes, operating model and technology solutions across all the countries that a company operates in

You will work side-by-side with R&D leadership within life science and healthcare companies to transform their organizations and help them achieve their scientific and business goals.

How you'll grow

Two of the most important tools in today's business world are experience and resources. At Deloitte, you'll find plenty of both. We believe in equipping our people with some of the best resources available and offering the experience, education, and opportunities you'll need at the various stages of your career. As a new Business Technology Analyst/Consultant, your first week on the job will start off with Technology Fundamentals, giving you foundational knowledge of the Technology practice and providing you with an overview of core consulting skills. It doesn't stop there; you'll also get the opportunity to attend the Project Readiness Simulation, a week-long intensive program where you will apply the knowledge gained through your studies to a real-life client situation. In addition, our work and clients will challenge you intellectually, enabling you to build both your experience and an exceptional professional network. Beyond the formal training, you will work with talented consulting professionals both on your client engagements and in your local office, granting you access to ask questions and gain valuable real world experiences. Qualifications

- Advance degree (MA, MS, Ph.D., MD, VMD, etc.) in Biotechnology, Biomedical Science or Engineering
- Strong academic track record (minimum GPA of 3.4)

- Demonstrated aptitude for technology
- Willingness to travel

The team

Our Technology Consulting team plays a major role in directly embedding technology insights into our clients' organizational goals. At Deloitte, our technology consultants create sharply-focused solutions within an organization's operating model, accounting for its people, intellectual capital, technology, and processes. Engagement teams at Deloitte drive value for our clients but also understand the importance of developing resources and contributing to the communities in which we work. We make it our business to take issue to impact, both within and beyond a client setting.

Benefits

At Deloitte, we know that great people make a great organization. We value our people and offer employees a broad range of benefits. [Learn more about what working at Deloitte can mean for you.](#)

Deloitte's culture

Our positive and supportive culture encourages our people to do their best work every day. We celebrate individuals by recognizing their uniqueness and offering them the flexibility to make daily choices that can help them to be healthy, centered, confident, and aware. We offer well-being programs and are continuously looking for new ways to maintain a culture where our people excel and lead healthy, happy lives. [Learn more about Life at Deloitte.](#)

Corporate citizenship

Deloitte is led by a purpose: to make an impact that matters. This purpose defines who we are and extends to relationships with our clients, our people and our communities. We believe that business has the power to inspire and transform. We focus on education, giving, skill-based volunteerism, and leadership to help drive positive social impact in our communities. Recruiter tips

We want job seekers exploring opportunities at Deloitte to feel prepared and confident. To help you with your interview, we suggest that you do your research: know some background about the organization and the business area you're applying to. We also suggest that you brush up on your behavioral and case interviewing skills and practice discussing your experience and job history with a family member, friend, or mentor.
