STARTUPS ARE COOL  
JOIN THE **FARAPP FAMILY**  
AND HELP US  
AUTOMATE **ECOMMERCE**

# FarApp is hiring!

## Who We Are

We are FarApp, a small eCommerce automation company run by our amazing team of 11 ambitious people. We have doubled our revenue in the last year and we are on course to do that again. We're growing fast and need to expand our team to keep up with our growth. Join our family and grow with us!

## Who You Are

We're looking for Software Engineers who are passionate about software and are interested in starting at the ground-level with a company so that they can help it grow and share in its success. We need people who are ambitious, smart, and ready to get things done. We hope that you're excited to make a big impact because you'll have plenty of opportunity to do that. We don't need somebody with a lot of experience but just need somebody who can learn new technologies quickly and is excited to make learning part of their regular routine. We try to never say no at FarApp because we believe we can develop anything. If that sounds like you, we look forward to your application!

## Why FarApp

- Become an eCommerce expert with Amazon, eBay, Shopify, etc
- Get experience working with a lot of different technologies, languages, and frameworks
- Startup culture with lots of opportunity for growth
- Fun, energetic team
- Great benefits including PTO, healthcare, catered lunch, work from home days, office snacks, happy hours, and more!

JOIN US AT [FARAPP.COM/CAREERS](https://farapp.com/careers)

FarApp is looking for a full-time Software Support Engineer in the Los Angeles area to join our team located in Torrance, CA.

FarApp is a service owned by The SGC Group, Inc. We're a small company that's growing quickly. We've doubled our revenue in the last year and we are on course to double it in the next year. We offer a cloud-based service that automates our customers' business processes. We automate their connections between their business systems and popular marketplaces and carts such as Amazon, eBay, Newegg, Buy.com, Sears, Yahoo, Magento, Shopify, Shipwire, and more.

There is a lot of active development at FarApp. This could mean connecting to a new marketplace or third party logistics company, or it could mean importing new data from an existing connector. We're also trying to expand our feature-set and are actively developing software for our future growth.

We're looking for somebody who is passionate about software and is interested to start at the ground-level with a company so that they can help it grow and share in its success. We hope that you're excited to make a big impact because you'll have plenty of opportunity to do that. If you're ambitious and smart, we're definitely interested. But if on top of that you're the type of person who gets things done, then we're looking for you. We work with a lot of different technologies with languages such as Python, PHP, JavaScript, C++, etc. and frameworks such as Flask, AngularJS, TurboGears, etc. So we don't need somebody with a lot of experience but just need somebody who can learn new technologies quickly and is excited to make learning part of their regular routine. We try to never say no at FarApp because we believe we can develop anything (though some things are harder than others). We're looking for people that have the same mindset.

#### Requirements:

- BS Degree in Computer Science or related field
- 3.0 minimum GPA
- Strong communication skills (since you'll be communicating directly with customers)
- Knowledge in Python, Flask, TurboGears, AngularJS is a plus
- Experience with eCommerce marketplaces and/or platforms and APIs is a plus

#### Benefits:

- Competitive salary
- Telecommuting (currently we work from the office 3 days a week)
- Bonuses
- Bi-annual raises
- Potential for equity in the future
- 401K
