

Job Title: Fraud Product Analyst

Company (based in Rancho Cucamonga, CA): CO-OP Financial Services

Website: <https://www.co-opfs.org>

Job Description

The position will allow the candidate to learn and apply a number of cutting-edge technologies (AI, blockchain, cloud, APIs, etc.) and products associated with the hot area of FinTech. The Fraud Product Analyst will support a specialized team of product owners in developing and implementing traditional and innovative fraud solutions for credit and debit in the mobile, shared branching and online channels. The candidate will be responsible for providing the technical support and analysis in designing and deploying a fraud strategy, as well as driving and enhancing existing fraud products that support CO-OP clients in improving their fraud-specific objectives, like minimizing fraud losses and decreasing false positives.

Specific responsibilities include:

- Support the roll-out and delivery all existing fraud-related initiatives to support CO-OP clients that align with current fraud strategy
- Be part of a team that creates rapid prototypes to help assess the efficiency of a number of third-party fraud products
- Ensure consistency, standards, Agile methodology and best practices in evaluating product delivery
- Learn and use cutting edge technologies used in fraud, like adaptive machine learning and blockchain
- Understand current solutions, optimize them and reengineer them, if necessary, in order to achieve optimal results

Qualifications:

- Bachelor's degree, ideally in quantitative field (e.g. computer science, engineering, etc.) and/or business administration
- Exposure to machine learning algorithms and data mining techniques a plus
- Understanding of rapid prototyping techniques
- Fundamentals of fraud management (detection, prevention, response) a plus
- Outstanding problem-solving skills, with ability to think creatively
- Self-motivated, able to handle many projects concurrently
- Understanding of human-centered design and design thinking methodologies

Availability: As soon as possible (Full-time/Part-time/Internship)
