

Rapid-Prototyping Expert (Part-time)

Hey there!

Me and my coffee-loving team are looking to hire a designer within the mechanical, environmental or industrial space. At Fresh Press we are bringing an entirely new coffee product to the market, and we need your help and expertise to bring our vision into the world.

As our designer you will be involved in a number of stages of product development including research, physical concept development, and rapid prototyping. The role will require at least 10-15 hours per week. Ideally we are looking for candidates in and around the LA area, but location isn't our main determining factor.

We are hiring on a rolling basis! So, if you're interested be sure to submit your portfolio ASAP.

Undergrad/Post-grad/Graduate all welcome to apply. Talent has no age.

What we're looking for/Responsibilities:

- Proven record of strong independent workflow
- Surfacing & familiarity with prototyping tools (i.e. mills, lathes, CNC mills)
- Sketching, 3D modeling, and prototyping experience
- Rhino 3D, V-ray rendering, AutoCAD, Solidworks knowledge
- Materials analysis - physical prototype integration
- Strong communication skills and ability to implement client feedback
- Excellent understanding of architectural/machine constructions
- Ensure that all deadlines and deliverables are met within specified time frame

Please make sure to include a link to your portfolio, or send a PDF attachment to freshpresscoffeeco@gmail.com.

Thanks for your interest!

Cheers,

-Fresh Press Coffee Team
