

## Front-End Web Developer Intern

The Front-End Web Developer will be responsible for all the front-end development of our client's new e-commerce website launching this year.

### *Duties:*

- Creation of new dynamic site layout / user interface from provided design concepts by using standard HTML / CSS / JavaScript (AJAX) practices.
- Perform SEO techniques in order to get indexed and increase prominence.
- Own entire presentation tier including CSS and JavaScript resources.
- Collaborate with Systems Architect, Creative and Product Management teams to design and develop web site user experience.
- Researching & prototyping new technologies (HTML5, CSS3) and providing recommendations for application improvement as it pertains to the user interface.

### *Requirements:*

- Knowledge of front-end technologies (D/HTML, JavaScript, CSS) and JavaScript libraries (jQuery)
- Background in web & object-oriented programming experience with ASP.NET / C# using MVC framework
- Experience with B2C, high traffic websites focusing on e-commerce a PLUS.
