

Company: Fullscreen Media

Job Title: Engineering Rotational Program (BruinView Job ID# 944472)

Fullscreen Media is seeking a talented Master's level graduate for our Engineering Rotation Program. This one-year program is designed to build participants with essential skills and expose them to rotations in our Mobile Engineering, Data Science, Business Intelligence and Technology divisions. The ideal candidate will have a passion for, and knowledge of digital entertainment and the world of social media influencers. During each three-month rotation, you will learn, how a tech media business operates in different capacities, as well as day-to-day skills on how to support teams and projects. You will use your creativity to solve real problems and apply what you have learned at school directly to your job while building professional relationships, providing you with the opportunity for a career in leadership within the company.

Responsibilities:

- Execute full lifecycle software development
- Write well designed, testable, efficient code
- Integrate software components into a fully functional software system

Qualifications:

- Master's degree in Computer Science or Engineering
- Ability to develop software in C, C++, Ruby, PHP, Python, Java or other languages
- Ability to document requirements and specifications
- Familiarity with software development methodology and release process
- Recent graduate of Master's program from an accredited college or university
- Must be in the LA area throughout duration of internship
- Working knowledge of Mac, Google Docs and Microsoft Suite
- Ability to learn quickly and experience producing high-quality work in short periods of time
- Willingness to go above and beyond to provide great work
- Excellent verbal and written communication skills
