

Funded Startup Searching for CTO to Join ASAP (Job Opportunity)

We're looking for a CTO/technical co-founder to join us at the accelerator and lead the development of our product. We have some remote engineering resources to support that person.

Our ideal CTO candidate has a full stack (front-end and back-end ability). But someone who is proficient in HTML and CSS on the front end, Java and PHP in the middle, and MySQL on the back is capable of building what we need.

To give you some more detail on the startup, TriplePulse (www.triplepulse.com):

TriplePulse is a subscription commerce business that delivers our members a monthly pack of vitamins and samples of the latest in sports nutrition:

TriplePulse | Your custom pack of essential vitamins, samples of the latest supplements and expert fitness advice | Delivered Monthly
