Software Engineer / Software Developer

Job Description
Gummy Ventures is an incubator and software development company for new and exciting projects. They take ideas from concept to reality, and have successfully launched multiple companies (including building and selling one of the top gaming companies on Facebook, with over 20 million unique users from around the world).

Gummy Ventures is seeking software engineers with a good work ethic and a desire to solve challenging problems while working with new and interesting technologies.

This individual would contribute to all stages of the software development lifecycle. Responsibilities include leveraging Java, MySQL, and other open source technologies to build and maintain highly scalable, highly available, web applications for a variety of markets.

Qualifications:
- Strong Java programming skills
- Strong understanding of design patterns and object-oriented programming principles
- Experience working with SQL for relational databases
- Good understanding of performance and optimization techniques
- Hands-on developer with strong debugging skills and ability to quickly learn new technologies
- Ability to use sound judgment to develop effective solutions from business requirements
- Detail-oriented
- Ability to work in a collaborative, start-up environment on interesting problems
- BS in Computer Science

Position Type
Full Time

Job Location
Westlake Village, CA
