January 9, 2015

HRL Laboratories LLC in Malibu, CA is recruiting outstanding young scientists and engineers for an exciting project at the frontier of science and technology. In particular, we are looking for graduating seniors, recent graduates, and graduate students who are interested in working in an industrial laboratory setting on cryogenic semiconductor experiments. We are looking for individuals at all education levels (BA/BS, MA/MS, and PhD) who have completed rigorous training in physics, electrical engineering, or materials science to join our team at HRL. Previous experience with low noise electrical measurements and cryogenics is desirable, but good scientific communication skills are required. In addition, US citizenship is required and applicants must be willing to apply for a security clearance. Please email me, Matthew Rakher, at mtrakher@hrl.com directly for more information. Thank you very much.
