

About this Job

Job description

We are looking for web developers to help us create cutting edge web sites and games based on CSS/JavaScript technologies. We promise that you'll experience some terrific brands, and you will never, ever get bored. We've built a company that's here to last, and we want people who are looking for a place to belong and put down roots.

Here are few examples of our recent work:

<http://www.thehungergames.movie/>

<http://thegunmanthefilm.com/>

<http://theageofadaline.tumblr.com/>

<http://www.nightatthemuseummovie.com/games/knightflight/>

Come work with our young company that operates on the intersection of creative design and advanced technology to define the future of entertainment, toys and games.

This is a full time salaried position in our Los Angeles office. Local candidates only.
