

JOB CODE: 2013010

TITLE: R&D Rework Lab Technician (Contract)

LOCATION: San Diego (Device)

DURATION: Contractor

LAST UPDATED: 1/10/13

DESCRIPTION:

R&D Rework Lab Technician

Huawei Device has a new opportunity for a R&D Rework Lab Technician to join our Innovation team in our San Diego office! A rework lab technician supports our engineering activities including fabrication and modification of assemblies and prototypes.

Working from schematics or layout diagrams, written and verbal descriptions, perform the work as needed and be responsible for installing and/or replacing SMD components, connectors, and mechanical parts on PCB for Huawei's Wireless Devices and Handsets products.

Skills/Experience

- Superb soldering & hot air rework skills (QFNs, BGAs, CSPs, 0201/0402 SMT components, etc.).
- Hands-on experience in the build of electronic devices and mechanical fixtures necessary for product testing.
- Experienced in the assembly and rework of prototypes.
- Be able to confer with engineers and others to generate rework instructions.
- Assist Lab Manager with lab space management.

Additional Skills

- Proficiency in Windows and Microsoft Office.
- Experience in CDMA, UMTS, GSM. Wi-Fi, Bluetooth a plus.
- Experience using Lab equipment (Power Supply, DMM, Temp Chamber, Oscilloscope)
- Effective verbal and written communication skills.
- Strong collaboration, team skills and a continual learner attitude.
- Creative problem solving skills.
- Effective time management skills.

Education

Requires two-year technical degree, trade school, or related military experience with 8+ years work experience.

If this sounds like a position where you can make an impact and you meet the minimum requirements, please apply now and you will be considered!
