COMPANY NEWS

Liventus, a Chicago based company, offers a complete array of consulting and development services nationwide, including web site design, graphic design, custom database development, site management, web site promotion, and marketing services.

INTERNSHIP: I.T.

Description

We are looking for an extremely detail oriented person preferably with a basic knowledge of HTML, VB, SQL Server, T-SQL, and .Net. In addition, experience in Commerce Server and Content Management is a plus.

User interface is often a must in our projects. So therefore in addition to creating programs that technically work, our developers and interns create programs that work for the user. Attention to details is a must, and experience in user interface design is a plus.

Responsibilities

- Design, develop and modify Microsoft [ASP.NET](#) Applications, .NET components, Web Services, and Enterprise Services components.
- Design, develop, and maintain SQL database schemas and scripts, including views, triggers and stored procedures.
- Deploy .Net systems to various production and pre-production environments and troubleshoot issues.
- Create technical documentation such as design documents, specifications, software architecture documents, and instructions.
- Analyze design and architectural issues and questions.
- Support management of the project development team.
- Work in a team environment using a structured development process and deliver applications on time and within budget.
- Follow up with issues in an efficient manner, including working hand in hand with Quality Assurance, Project Management and/or Sr. Developers.
- Regularly communicate project progress, issues, and risks to project manager.

Requirements

The ideal candidate should be very strong or have exposure to SQL and .NET and have experience with classic ASP. The candidate should also have some exposure with architecture and design for large, enterprise applications. Any experience leading teams of developers is a plus.

Responsibilities to include writing SQL and .NET code and interacting with users to gather requirements. The candidate will also be involved in helping to set standards for development and making improvements to the architecture of the application and to the development environment.

Location

[Northbrook, IL](#) (northern suburbs of Chicago)
