

Part time and Internship Opportunities For Embedded Software Engineer

Silvus Technologies, Inc.
10990 Wilshire Blvd., #1500,
Los Angeles, CA – 90024

Silvus Technologies has internship positions available in the following area:

- Embedded networking software development

Silvus provides competitive salaries and a flexible working environment. Interested candidates are invited to send a copy of their resume to jobs@silvustechologies.com.

About Silvus:

Founded in 2004, Silvus is at the forefront of delivering multi-antenna MIMO solutions designed specifically to meet the needs of military, first-responder and commercial markets. Since launching the SC3500 radio solution, the company's products have been used in applications as diverse as: (i) Robotic teleoperation in support of EOD missions (bomb disposal); (ii) High definition video links to/from broadcast news helicopters; (iii) video links in tunnels and caves.

As a boot-strapped company with no venture capital investment, Silvus is owned entirely by the employees and provides a unique opportunity for growth. It is the ideal place for an entrepreneurially minded, resourceful individual interested in a broad learning experience with exposure to multiple facets of engineering and the product life-cycle.

Opportunity:

To participate in the development and testing of various networking applications and features on Silvus' StreamCaster MIMO IP radios. Possible topics are IGMP multicast and snooping, VLAN, Dynamic Link Exchange Protocol (DLEP), Joint Architecture for Unmanned Systems (JAUS), Cursor on Target (CoT), video and audio streaming, etc.

Qualifications:

- Proficiency with C a must.
- Familiarity with Linux and TCP/IP networking.
- Experience with socket programming.
- Experience with Python a plus.
- Experience with Javascript a plus.

Contact Information:

Qualified candidates should send their resumes to jobs@silvustechologies.com with subject line 'Embedded Software Intern'.
