Math Tutor Wanted

I am looking for an engineering student to tutor my 8th grade son in honors math (algebra & geometry). He is a very good math student who benefits from regular work with a tutor to excel in the subject. I am looking for a student who can come for 90 minute sessions at our house very close to Century City about once/week. Salary is competitive and will be discussed on an individual basis. I know of several other students also looking for a math tutor so this may lead to work for more than one family. Please email me if you are interested at: cynthiaantin@yahoo.com
