JOB DESCRIPTION

The Senior JavaScript Developer works closely with a tightly integrated team to produce web-based applications, which includes front-end development for healthcare software. The ideal candidate has a degree in Computer Science or a related area; at least five years of experience writing in JavaScript; and experience coding in HTML, CSS, JavaScript, and JQuery using web standards and best practices for scalability and accessibility. Candidates must be self-directed team players who thrive in a continually changing environment.

RESPONSIBILITIES

- Works on all development cycles for multiple projects for web applications
- Maintains existing code and functionality once it has been released to the public
- Maintains hands-on knowledge of current best practices for standards-based technologies
- Helps design, develop, and manage web applications
- Builds proof-of-concept mock ups and rapid prototypes
- Recognizes and solves cross browser compatibility issues
- Helps define software architectures by collaborating with leads to explore existing systems, determining areas of complexity and potential risks to successful implementation, and learning application capabilities
- Works with the team to create an inspirational and creative work environment
- Performs other duties as assigned

QUALIFICATIONS

- Bachelor's degree in Computer Science or other related area or equivalent work experience
- Highly skilled at front-end engineering JavaScript and CSS (minimum 5 years writing JavaScript)
- Experience coding HTML, CSS, JavaScript, and JQuery based on web standards and best practices for scalability and accessibility
- NoSql, Angular, Node experience is a plus
- Skilled at following coding standards and building appropriate unit tests, integration tests, and deployment scripts
- Experience with Visual Studios 2010 and newer is a plus
- Self-directed team player who thrives in a continually changing environment
- Strong interpersonal and communication (written and verbal) skills are required
- Strong technical writing and documentation skills required
- Basic business math skills required
- Strong analytical skills and the ability to think outside the box

- Highly organized and detail oriented
- Strong planning and coordination skills
- Able to effectively interpret technical and business objectives and challenges and to think abstractly and deal with ambiguous/under-defined problems
- Must have demonstrated skills with standard software applications, including Windows and Microsoft Office, and strong internet skills
- Database management skills for producing reports are a plus
- Familiarity with support and troubleshooting personal computers required

BENEFITS

- Vacation
- Paid Sick Time
- Floating Holidays
- Medical Insurance
- Dental Insurance
- Vision Insurance
- Life Insurance
- AD&D Insurance
- Long-term Disability Insurance
- 401(k) Savings Plan with Employer Matching Contribution
- Voluntary Additional Benefits
- Educational Assistance
- Public Transit Reimbursement
