

Metropolitan's Engineering Services Group designs and manages the construction of water-related structures and facilities, including pipelines, water treatment facilities, operations centers, hydropower plants, reservoirs and numerous regulating structures.

Metropolitan offers two internships - summer and year-round. Both internships are designed to augment the students' studies with practical work experience at Metropolitan. We are excited to announce the current Year-Round Internships are now open (click on link below) and the Summer Program application period has closed:
