

Microprocessor VLSI Design Engineers

There several immediate entry level job openings for Digital VLSI Microprocessor Design Engineers at Intel in Portland, OR.

Join the team that has designed the flagship processors for Intel over the past 20 years. You'll be responsible for definition and implementation of the next-generation Intel CPUs. **Typical responsibilities span Circuit design, logic design, chip planning, synthesis, functional/electrical design verification and test development.**

Requirements for the position include a B.S.(GPA >3.2) or M.S. (GPA >3.5) in electrical/computer engineering or equivalent. Strong fundamental skills in digital hardware design, VLSI circuit design, MOS Devices and Computer architecture are required. Good programming skills will be an advantage.
