

Northern Ecosystems Research for Undergraduates (NERU)

Applying to the Program

Join our geo-science and environmental science researchers in current scientific research projects through the Northern Ecosystems Research for Undergraduates program.

Who should apply?

UNH-Abisko Summer Research Internships are open to students who are completing their junior year of college. Students should have a strong academic record with relevant coursework in the Earth Sciences (environmental studies, Earth systems science, atmospheric science, oceanography, ecosystem studies, geology or advanced research in Earth and atmospheric sciences). We also look for a strong interest in contributing to advanced research in Earth, ocean, and atmospheric sciences. Participants receive a stipend, travel allowance, and room and board at the University of New Hampshire (UNH) and the Abisko Scientific Research Station (ANS).

Next application deadline is December 1st, 2011

we will review all applicants and notify students by December 20, 2011. At that point, you will have time to organize passports and summer travel plans.

Please download the application form, complete, and email to neru@sr.unh.edu

Applications shall include:

1. An undergraduate transcript (Unofficial copies are accepted).
2. A statement by the student of his or her research and career interests.
3. Completed application form.

Download the pdf application form...

Note: When you have added your information to the application form, use the submit button on the form to send it via email.

If you are already a University of New Hampshire student, contact Dr. Ruth Varner directly (ruth.varner@unh.edu) directly to learn about an alternate application process
