

Odebrecht Award for Sustainable Development

\$65,000 award opportunity for the student(s) and faculty who come up with the best sustainable idea. The Odebrecht Award for Sustainable Development is accepting entries from undergraduate students of all engineering fields, architecture, building and construction management, and chemistry. I hope you'll be able to announce this at your next meeting, post it on your social networks, or include it in a newsletter.

The entries will be judged based on real-world applicability and how closely the entry adheres to Odebrecht's multifaceted view of sustainability<<http://issuu.com/odebrecht/docs/sustainabilitypolicy>> as a synergy of economic development, social development, environmental balance, political participation, and cultural diversity. The winning students have the potential opportunity to develop and implement their innovative ideas with Odebrecht.

Entries will be accepted until May 31, 2012. I'd love your help in spreading the news to your club members and classmates should any be interested in submitting an entry.

Groups of students can collaborate on their idea, so perhaps it would make for a challenging club project! You can all learn more at the website<<http://www.odebrechtaward.com/>>, Facebook<<http://www.facebook.com/pages/Odebrecht-Award-for-Sustainable-Development/178604145541970>>, and Twitter<<https://twitter.com/odebrechtaward>>.
