

PRODUCT ENGINEER INTERNSHIP

DEVELOPMENT/TESTING/MANUFACTURING OF NEW PRODUCTS

START DATE	- FLEXIBLE BUT IMMEDIATE/SOON
LENGTH OF INTERNSHIP	- FLEXIBLE but 4 weeks minimum.
HOURS	- FLEXIBLE/PART-TIME
PAID	- UNPAID. SCHOOL CREDITS/SCHOOL RELATED WORK EXPERIENCE

I am the owner of 2 busy product development businesses based out of Westwood, Los Angeles, 90024.

An aerospace engineer who works on NASA projects is designing our new, innovative product for the leisure industry. We are in the final stages of this prototype invention and design and so you will have the invaluable benefit of watching the development and manufacture of this exciting new product from scratch! As things are getting very busy, we need an intern to help finalize these 2 designs before starting on 2 new projects.

This intern will, not only be involved in the development of the product design, manufacture, marketing, and launch of this new product but also be intrinsically semi-involved in the running of a business. They will be learning with highly important 'hands-on' experience, ready to integrate their new knowledge into the next stage of their career. This internship is unpaid but can be used towards school credits and obtaining work experience and an excellent reference. After a successful internship period, and depending on the productivity, personality and progress of the intern, the position *may* become paid with huge room for advancement in the very near future.

REQUIREMENTS

- excellent knowledge of Solidedge, Solidworks, Pro engineer or Catia
- 110% reliability and dependability
