

**Paid Hydrogeology - Internship Opportunity, this summer, Apply Now! Work starts in June.**

Sonoma County Water Agency is offering a summer internship in our Engineering and Resource Planning Division with:

- great projects to work on, like ground water modeling & sustainable groundwater management planning ([sonomacountygroundwater.org](http://sonomacountygroundwater.org))
- valuable work experience & industry contacts
- \$16.54 per hour (Graduate) or \$13.61 per hour (Undergrad)
- flexible hours

Our ideal candidate has a background in geology, hydrology, or civil and environmental engineering.

The Sonoma County Water Agency is involved in a number of interesting projects throughout Sonoma County that the intern will learn about and contribute to, these include:

- analysis for the Sustainable Groundwater Management Act (SGMA)
- operation of a unique riverbank filtration system for water supply
- maintenance of a large groundwater monitoring network

Tasks assigned will involve a mix of data analyses (groundwater budget analyses, time-series analyses), fieldwork (groundwater level collection, streamflow measurements), GIS, or hydrologic analyses (hydraulic modeling, reservoir operations).

**Please email your resume and statement of interest to: WA Human Resources at**
